

# Account View

Internet Access to your  
Brokerage Account

## Account and market information when you need it, tailored the way you want it

Account View gives you access to information about your account(s) via the Internet. With Account View, you'll have access to your account balances and positions virtually 24 hours a day, 365 days a year. And your transaction history is at your fingertips. Plus, you can tailor the content based on your personal interests.

## MY PORTFOLIO

### A view of your brokerage accounts

Satisfy your most basic information requirements simply by logging on to Account View for an update. After viewing your account's Net Worth, zoom in for a closer look. Access your Account Detail, Positions, 90-day History, and Balances in a few simple clicks whenever it's convenient. You can also view images of your account statements and tax documents.

Account	Net Worth	Account Actions
John 179-128813 - CORPORATION	3,066.10	Select Action
Mary 179-128830 - CORPORATION	3,569.23	Select Action
Total Net Worth: \$7,237.33

## PERSONAL CENTER

### Personalize content based on your interests, account information, and holdings

With the Personal Center, you no longer have to click through numerous Web sites to find the market information that matters most to you. Just specify the content you want, and the Personal Center will continuously deliver the most current information available!

- Set up a personal quote list, receive news and commentary from CBS MarketWatch, and take advantage of weekly and daily market reports from Lehman Brothers — all based on the securities you follow.
- Set up an index chart, additional index information, analyst commentary, and even AccuWeather, Inc. to create a page layout that suits you best.

The screenshot displays the Fidelity Personal Center interface. At the top, it shows the user's name (FRAG - FISC IES) and navigation options like Home, Important Legal Information, and Log out. Below this is a personalized quote list table with columns for Symbol, Last, Change, % Change, and Volume. The table lists several securities including IBM, MSFT, KO, JNJ, INTC, T, LU, CCLL, and CSCO. To the right of the quote list, there are sections for Market News, Sector News, Street News, and Commentaries. Below the quote list, there is a 'Dow Jones Industrial Average' section with a line chart showing the index's performance over time. The interface also includes a search bar, a 'Get News' button, and various links for account information and services.

For illustrative purposes only. Customize the Personal Center for specific securities, indexes, news, analyses, and more.

## System requirements

### Operating System

**Recommended:** Windows® 98 — 2nd edition, Windows NT® 4.0, NT w/SP 5, Windows® ME, Windows® 2000

**Minimum:** Windows® 98, Windows NT® 4.0 w/ SP 3 or higher

### Browser

**Recommended:** Microsoft Internet Explorer (IE) 5.5 or 6.0, Netscape Navigator or Communicator 4.77 with 128-bit encryption (Netscape 6.x or higher is currently not supported)

**Minimum:** IE 4.01 with Service Pack 2 with 128-bit encryption, Netscape Navigator or Communicator 4.5 with 128-bit encryption

### Notes:

- Macintosh® is not fully compatible with the Web site and is therefore supported on a best effort basis. Internet Explorer 5.01 or Netscape 4.79 (both with 128 bit encryption) work best with Macintosh.®
- America Online® (on a PC or Macintosh®) is not fully compatible with the Web site and is therefore supported on a best effort basis.
- For issues with America Online®: minimize AOL® after connecting and open IE or a Netscape browser from the desktop and navigate from the browser.

## **Securing your account information**

For your protection, all account information is encrypted using SSL (Secure Socket Layer) technology.

**Get started today**

<sup>1</sup>There is a 20-minute delay on market information.

<sup>2</sup>Encryption is the process for scrambling your account information as it passes between Fidelity Brokerage Services LLC and your computer. The encryption process is built into most Internet browsers. The larger the number of bits for encryption (e.g., 40 or 128), the more difficult (exponentially) it is for an unauthorized person to unscramble the transmission. The level of 128-bit encryption is a secure way to access your account information.

Account View is a service of Fidelity Brokerage Services LLC.

Market news and commentary provided by CBS MarketWatch.

The third-party service providers listed are independent companies and are not affiliated with Fidelity Investments.
